Comments: To whom it may concern,I would like to comment and support an option one on the Flat Canyon Allotment. We have a lot of producers, trying to remain in the sheep business and we cannot keep losing sheep range. In my 30+ years of experience I have hiked water during dry times to water the herd. This is very do-able. I believe the vegetation is better suited for sheep range than cattle range. Moving the grazing season to summer and changing to cattle would greatly compound the water problem. I would like to see this re-offered as a Sheep range. I am interested in the opportunity to run on this allotment. I appreciate all the work you've put in to analyzing this.Thank you
