Title:

Comments: I feel the usage of snowmobiles in our area do not make an impact to the level that is being portrayed. The areas of proposed closer have been being rode in for 50+ years with no impacted to the wildlife (Grizzly Bears and Lynx) in fact, there seemed to be more off both of these in our area than ever before. I little research by biologists will show this is a fact. Like my grandpa always said, "If it's not broke, don't fix it."
