Comments: I always want to go there an area for recreation. Such a beautiful place. My precious friends always tell me a story of nature Kootenai things in history. I do not want the closure of this national park, such a beautiful. I do not see any reason to close because due of the impact on the environment. The impact to wildlife, not the issue and the declining animal population. Caused by the mismanagement of predatory animals. most time, my experience view with mountain lions, wolves, grizzlies, and other predatory animals after moose, elk, deer, rabbits, and different types. That is when using vehicles that give animals fighting a chance to escape from predators to navigate in deep snow. Help to control the population through trapping and hound hunting. plus create recreation, good study to access by motorized travel and make rule and official trail system and respect nature. Again, Snow motorized not big affect the environment. only caused by congress break their own rule and control for their own selfish reason. please stop closure for recreation nature.

Thank you,

Jordan Voeltz
