Comments: Thank you the opportunity to comment on motorized over-snow use. As an out-door enthusiast, I love the quite, peace and serenity of winter. Being out on a snow shoes or cross county skis is pure joy!

While I am not an over-snow motorized user, I respect the right of those who are. I see the FS role as managing the forest for wildlife in balance with recreational use. Please consider the effects of sound when designating over-snow vehicle use. What does science show for sensitive species? Please included wolverines also.

Thank you for the work you do.
