Comments: I respectfully ask you if you have personally read our US constitution lately? The federal government was never meant to take control of all our lands or to overreach the many subjects they currently oversee (education. health, work). Pleaae start to bring sanity back to govt. We dont need the govt to close down our forests (national land PAID for by our tax dollars!!). We dont need more laws and regs. At the very least the states should control their own lands. Please do not go through with this overreach and steal our public lands!
