Title:

Comments: Comments: I support this project. It should be standard operating procedure for sound forest management as well as people and infrastructure damage mitigation.

I also encourage utilization of the material for lumber, chips or fuelwood to help offset the cost.

Question: Who will be responsible for debris management to remove felled trees and large branches at the sight so we are not left with an unsightly and dangerous mess by our roads and trails. PG&E and ACRT point their fingers at each other and their subcontractors leave a mess.
