Comments: To whom this may concern. The proposed closure and dates added for limiting snow recreation is absurd. No habits are hurt in snowmobiling, there are even cases where old snowmobile tracks help moose navigate the deep snow. Furthermore all that access into the tenlakes area is done with snowmobile, Including people that want to ski, snowshoe, fish, and hunt. The only thing that these closures accomplish is taking away accessible land for those who use it. I don't just speak for myself. These closures will also crush the local economy in the winter for places that rely on snowmobile culture revenue. Please listen to the people that live here, it will affect us all.
