Comments: My primary use of snowmobile's is trapping but I do also like to go play in the High country. from what I see you are closing year long open roads to snowmobiles. I need a sleigh or a box on my sled to carry all of my trapping gear because it weighs well over 100lbs. If I am cat hunting with my snowmobile I have to have boxes to carry my dogs. I cannot do this without my snowmobile. And using open year long forest service roads even in BIG GAME HABITAT. All year round open roads need to be allowed for snowmobile use even through big game HABITAT.

Why is dry creek, the area north of the powerline off road 2220, and chicago peak closed? These areas are not in wildlife habitat areas or in wilderness. Snowville use should be allowed. Buffering should not be allowed.

Buffering is not not in your forest plan to do so these areas should be allowed to snowmobile.
