Comments: Dear USDA Forest Service,

I have recently learned of the following concerning facts. Please take these into consideration:

Killing native predators to protect sheep or cows should be prohibited if domestic livestock grazing is allowed to continue. The SDEIS fails to disclose how many native predators-such as black bears, mountain lions, or coyotes-are killed in the High Uintas Wilderness to protect domestic sheep. The SDEIS also fails to disclose the effects continued sheep grazing has on the potential for recovering native wildlife such as wolves and grizzly bears.

It is important to provide protection and balance for native species.

Thank you for your consideration in this matter.

Sincerely,

Cheryl Trospen
