Comments: No to domestic sheep or cow grazing on these lands!!!

Years of extensive grazing by domestic sheep has displaced native wildlife, led to persecution of predators like bears, coyotes, and mountain lions, marred the landscape, compromised water quality, and negatively impacted visitors seeking solitude and an authentic Wilderness experience.

Over the past couple of decades, bighorns from a nearby reintroduction effort have found their way into the High Uintas Wilderness and a nascent herd is becoming reestablished on its eastern end where domestic sheep grazing ended years ago. But the future of the bighorn herd and its ability to recolonize its native range across the High Uintas is in doubt because much of the rest of the bighorn range is filled with domestic sheep that carry disease fatal to the bighorns.
