Comments: i want allsheep and cattle grazing off all national lands,it is time for those cattle industry profiteers to buy stateland, or lease state land or private land for their cattleand sheep. this is a business that has been paying cheap cheap cheap rates to destroy our national land for the last 100 years and gaining more and more land every year. they are rapacious destroyhing all natural plants and wildlife i this region. they are absoluey rapacious. they got a deal and they dont intend for the 340 million americans to throw them out.they want the deal to go on forever.it shoudl nto go on forever. we have more and more people who need the wilderness and nature to be saved, not their industry.

i also think we need to watch the private group called public lands trust which appears to be all retired blm workers who maybe they got a good deal too over time and may be all wrapped iup in this cattle and sheep business. we all need to lookinto that. the normal worker sat blm is getting abot \$170,000 a year for his 40 hour week, if he has a 40 hour week. they are very well paid. did they buy land and now they ae part of the cattle industry so their connection to the us bureau of land management is too strong for the rest of america 340,000,000have no voice at the blm. i cant tell you nobody from the rest of america has a voice at the us bureau of land managment. its all sewn up tight. they dont listen to 300,000 letters requestng to save the wild horses and they keep on slaughtering them. i am very angry about those helicopter raids to kill wild horses and burros. very riled up. the publc lands trust is not that big a group. why do 340,000,000 americans have less of a voice than they have. insiders need to get outside now.we aresick of corruption at our govt agencies. far too widespread
