Title:

Comments: Our family supports the NO grazing option as it is best for the wildlife, watersheds, recreation, and the Wilderness! At the very, least, the "Forest Service" MUST close, any, sheep grazing allotment if the permit is waived back to the "Forest Service"!?

Domestic sheep grazing is incompatible with recovering, native, bighorn sheep population. If, domestic, sheep grazing remains in the "High Uintas", the, native, bighorn sheep are, likely, doomed!

The "High Uintas Wilderness" MUST be dedicated to its, native, wildlife! To the extent livestock grazing is allowed, it MUST be limited so as to not compete with wildlife for food, or, space, or, to spread disease to, native, species!

Grazing by, domestic, sheep and cows compromises the, "High Uintas", watersheds, fouls the lakes and streams, and, severely, degrades the experience of visitors seeking a, Wilderness, experience! Grazing MUST be curtailed to meet the public's interest in protecting the "High Uintas" for wildlife and an, authentic, Wilderness experience for visitors!

Killing, native, predators to protect sheep or cows MUST be prohibited if, domestic, livestock grazing is allowed to continue! The "SDEIS" fails to disclose how many, native, predators-such as black bears, mountain lions, or coyotes-are killed in the "High Uintas Wilderness" to protect, domestic, sheep! The "SDEIS", also, fails to disclose the effects, continued, sheep grazing has on the potential for recovering, native, wildlife such as wolves and grizzly bears.
