Title:

Comments: The High Uintas Wilderness should be dedicated to its native wildlife and flora. Grazing by domestic sheep and cows compromises the High Uintas watersheds, fouls the lakes and streams. It can introduce disease. Grazing should be curtailed to meet the public's interest in protecting the High Uintas for wildlife.

Domestic sheep grazing is incompatible with recovering native bighorn sheep population. If domestic sheep grazing remains in the High Uintas, the native bighorn sheep are likely doomed.

Keep the High Uintas as true Wilderness. Keep domestic grazing out of the High Uintas.

Thank you
