First name: Randie

Last name: Holloway

Organization:

Title:

Comments: Sheep will graze all the venation off the land and make more desert. There is plenty of land in Tooele and the surrounding area where they can graze. Take the sheep out of the Uintah's. You are destroying any and all natural environments America was known for. We had abundant resources. You are destroying one of them.

The sheep will prevent the native Big Horn sheep from returning, eating all the vegetation. They will change stream flows and possibly kill fish in the process.

Keep sheep out of the Uintah's. Corporate do not belong there.
