Comments: I am proposing to protect these fragile, high elevation alpine basins in the High Uintas Wilderness from even more domestic sheep grazing, which destroys nature and soil, surface and landscape! Worst of all, it displaces native wildlife, causes persecution of predators like bears, coyotes, and mountain lions, this is truly absurd!

The SDEIS fails to disclose how many of these precious native predators are and will be killed in the High Uintas Wilderness just to "protect" private livestock, let them graze on private land, that's what the public wants.

This continued sheep grazing has a disastrous effect on the recovery of native wildlife such as wolves and grizzly bears. Please abort these heinous plans!
