Title:

Comments: The High Uintas Wilderness should be dedicated to its native wildlife. Grazing by domestic sheep and cows compromises the High Uintas watersheds, fouls the lakes and streams, and severely degrades the experience of visitors seeking a Wilderness experience. Grazing should be curtailed to meet the public's interest in protecting the High Uintas for wildlife and an authentic Wilderness experience for visitors.

Domestic sheep grazing is incompatible with recovering native bighorn sheep population. Killing native predators to protect sheep or cows should be prohibited.

Support the no grazing option as it is best for the wildlife, watersheds, recreation, and the Wilderness.
