Comments: Sorry, I got interrupted in my comment! As I started to say, the High Uintas Wilderness should be preserved as wilderness, including as a priority the native wildlife, including the native bighorn sheep. Domestic sheep have no place there; they are crowding out the native wildlife. That is true also for domestic cattle grazing. Native predators like mountain lions should NOT be killed for preying on domestic sheep! This is their land. I strongly support the NO GRAZING option. Thank you.
