Comments: This is so ridiculous as to be laughable; why are you allowing domestic sheep to be grazing in a beautiful wilderness area? So Bighorn Sheep can get a fatal disease from domestic sheep; you are killing valuable predators that BELONG there to protect said domestic sheep...what is wrong with this picture??

How dare you prioritize ranchers domestic flocks that absolutely do not belong there over the wildlife that does. I have seen livestock grazing there and it was detrimental to my wilderness experience to say the least. I will not return until this matter is rectified.
