Comments: To all those reading,

I have lived in North Western Montana for a decade and recreated in the Ten Lakes area of the KNF for the entire time. I believe that restricting use of the Ten Lakes area as laid out by the travel plan from the USFS will only hurt our community both socially and economically. I would be interested in seeing scientific data to show that these restrictions would be helpful in any fashion but none has been presented. For these reasons I strongly oppose this plan.
