Comments: Please allow the High Uintas Wilderness area to be wild and free for wildlife to thrive.

We have to protect the eco-system and not allow some breeds to become dominant. Please do not bring in animals that graze as that will really upset the balance. The native Bighorn sheep live in this area and need to be protected too.

The other point is that grazing contributes to local contamination of waterways and rivers. This should be very important consideration as pretty much all the rivers are now contaminated due to human interference and run-offs from farms and agriculture. We cannot allow this trend of careless and reckless management of public land to continue.

I urge you to keep this area wild for future generations.

Thank you.
