Comments: To whom it may concern,

Protect native wildlife and the fragile, high elevation alpine basins of the High Uintas Wilderness from domestic sheep grazing. As an example of the inadequacy of the SDEIS, it fails to disclose how many native predators-- such as black bears, mountain lions or coyotes are killed every year to protect domestic sheep. End grazing in the wilderness, which benefits a few ranchers to the detriment of all other wilderness users and wildlife. Then, begin to mitigate and restore the damage done by years over overgrazing. Thank you.
