Comments: I urge the U.S. Forest Service to reconsider and not allow domestic farm animals like sheep to graze on public (federal) land. We should be mindful on the impact that grazing will have on the native species.

Grazing by domestic sheep and cows compromises the High Uintas watersheds, fouls the lakes and streams, and severely degrades the experience of visitors seeking a Wilderness experience. Grazing should be curtailed to meet the public's interest in protecting the High Uintas for wildlife and an authentic Wilderness experience for visitors.

Thank you!
