Title:

Comments: Domestic sheep grazing is incompatible with recovering native bighorn sheep population. If domestic sheep grazing remains in the High Uintas, the native bighorn sheep are likely doomed.

Killing native predators to protect sheep or cows should be prohibited if domestic livestock grazing is allowed to continue. The SDEIS fails to disclose how many native predators-such as black bears, mountain lions, or coyotes-are killed in the High Uintas Wilderness to protect domestic sheep. The SDEIS also fails to disclose the effects continued sheep grazing has on the potential for recovering native wildlife such as wolves and grizzly bears.
