First name: James

Last name: Smith

Organization:

Title:

Comments: My ancestors and grandparents were Appalachian people. We, like them, love the remaining natural parcels of forested land in kentucky. Please conduct a full Environmental Assessment (EA) including an analysis of impacts to the Sheltoewe Trace. The Forest Service needs to consult with the Sheltoewe Trace Association and address any concerns before approving the project. Please keep your word to preserve high quality user experiences of the Sheltoewe Trace, and to not log along the trail or in its viewshed.
