Comments: Ok - whose non-brilliant idea is it to kill native predators to protect sheep or cows?

It's not ok - this is a WILDERNESS area - what part of WILDERNESS is not understood? The SDEIS fails to disclose how many native predators-such as black bears, mountain lions, or coyotes-are killed in the High Uintas Wilderness to protect domestic sheep. The SDEIS also fails to disclose the effects continued sheep grazing has on the potential for recovering native wildlife such as wolves and grizzly bears. This has GOT to stop!

Support the no grazing option as it is best for the wildlife, watersheds, recreation, and the Wilderness. At the very least, the Forest Service should close any sheep grazing allotment if the permit is waived back to the Forest Service.

It's not rocket science - it's wilderness - time to start protecting it before it's gone & we're all screwed.
