Comments: To All Interested Parties,

Greetings. Old trees are an investment of time that is longer than our lives will last. That is a significant investment. One that is not easily replaced. Our old trees deserve our respect and admiration. Please think long and hard before you decided to cut down a tree that has taken a hundred years or more to be what it is today. Once you have cut down that tree you will not be able to replace it in your lifetime.

I oppose the cutting down of old growth forest. They are not replaceable. Respect the incredible work that our earth and those trees have done to live as long as they have. Please do not destroy something that you cannot replace.

With Respect,

Cecil Peppiatt
