Comments: Dear Sir:

I am opposed to domestic livestock grazing on public lands. It is impossible for the USDA Forest Service to comply with the 1960 Multiple Use Sustained yeild Act while allowing 10,000 sheep to graze over so much public land and still provide wildlife habitat for large predators. Can't be done with Utah Fish and Wildlife shooting, trapping and poisoning them constantly for one group of citizens.

Stop this insanity. Do not renew these destructive grazing leases'. For profit livestock grazing must occur on private property.

Cancel the lease please. Restore sanity to something as simple as feeding sheep.

Thank you for reading and carrying out my extremely important request.

Sincerely,

James Woods
