Comments: Good People, I am a Westerner by birth having been born in Twins Falls, Idaho and education at ISU. I know the Intermountain West very well. That is why I urge you to adopt Option 1 eliminating sheep grazing in the wilderness area. The sheep compromise the lands, both flora and fauna. This is hardly news to anyone who pays attention to these areas. As the changing climate creates many threats to wild lands, the least we can do is remove the most obvious problems, such as sheep grazing.

Thank you for reading my comments. The Earth, there's only one.
