Title:

Comments: END domestic grazing in the High Uintas Wilderness in order to protect native wildlife, restore the degraded watershed, and enhance opportunities for an increasingly rare Wilderness experience. To mitigate impacts to the few affected ranchers, the Forest Service should decide to retire grazing permits that are voluntarily waived back to the agency, giving the ranchers the opportunity to seek compensation from conservation interests before the allotments are permanently closed.??

STOP KILLING native predators-such as black bears, mountain lions, or coyotes to protect domestic sheep!
