Comments: Thank you for taking the time to read my comments concerning grazing in the High Uintas Wilderness. My concerns for continuation of domestic animal grazing is as such:

- 1) As a designated US Wilderness Area, the High Uintas Wilderness should be dedicated to its native wildlife.
- 2) Grazing by domestic sheep and cows compromises the High Uintas watersheds, and fouls its lakes and streams. Domestic livestock grazing should be eliminated to protect the flora and fauna of the High Uintas Wilderness.
- 3) Domestic sheep grazing is incompatible with recovering native bighorn sheep population.
- 4) I support the no grazing option, as it is best for the wildlife, watersheds and Wilderness. After all, the High Uintas Wilderness is a designated wilderness area. Leave it be. Graze somewhere else.

Thank you,
