Comments: Wilderness doesn't need sheep! For God's sake, STOP ONLY THINKING ABOUT MONEY!

The High Uintas Wilderness should be dedicated to its native wildlife. Why should there be ANY domestic animal grazing? Grazing by domestic sheep and cows compromises the High Uintas watersheds, and fouls the lakes and streams.

Domestic sheep grazing is incompatible with recovering native bighorn sheep population. If domestic sheep grazing remains in the High Uintas, the native bighorn sheep are likely doomed, and that's horrible.

There should be NO killing of native predators to protect sheep or cows!! The SDEIS fails to disclose how many native predators-such as black bears, mountain lions, or coyotes-are killed in the High Uintas Wilderness to protect domestic sheep. The SDEIS also fails to disclose the effects continued sheep grazing has on the potential for recovering native wildlife such as wolves and grizzly bears.

Support the NO GRAZING option as it is best for the wildlife, watersheds, recreation, and the Wilderness.
