Title:

Comments: The High Uintas Wilderness should be dedicated to its native wildlife.

These factors must be considered when deciding whether to allow livestock grazing:

- 1.Livestock grazing must not compete with wildlife for food or space
- 2.Livestock grazing must not spread disease to native species
- 3.Domestic sheep and cow grazing compromises watersheds and fouls the lakes and streams
- 4.Livestock grazing degrades the Wilderness experience of visitors
- 5.Domestic sheep grazing is incompatible with recovering native bighorn sheep population
- 6.Killing native predators to protect sheep or cows should be prohibited.

I support the no grazing option as it is best for the wildlife, watersheds, recreation, and the Wilderness.
