Comments: Initial questions:

Why is the Lolo National Forest not included in this project?

Why is McClain Creek the northern boundary? Because everything north burned in 2017?

Will ALL land owners be notified of proposed operations, including, but not limited to "prescribed burns" which would/could affect their land/property?

Will the United States Forest Service accept responsibility for USFS-initiated operations which get out of control?

Will compensation be made for damaged private property?
