Title:

Comments: I'm writing to oppose the U.S. Forest Service plan to engage in a major commercial logging operation, including clearcutting and prescribed burns, for the next 5 to 10 years, on land in the Sandwich Range of the White Mountain National Forest, with operations centered at the Ferncroft and Liberty trailheads. As a resident of the area, I oppose this commercial operation and the effect it will have on the wild places that residents and visitors enjoy so often, as well as the flora and fauna that compose the ecosystem and call it home. Please consider alternative plans that do not cause so much disturbance and distraction to the surrounding community.
