Comments: As a frequent user of the Sheltowee trace, I have seen the damage logging has done to the trail even though the logging was supposedly done away from the trail. One of the great assets of the trail is its remoteness. The area being considered for logging has experienced significant logging in the not too distant past...we still see the effects of that. Please restrict any logging to be done "out of sight" of the trail thereby giving hikers a more remote and peaceful experience. Thank You
