Comments: RE: Sandwich Vegetation Management Project #57392

As a resident of the region that will be affected, I am writing to express my vehement opposition to project 57392. The outdated and egregiously flawed 2005 draft environmental assessment alone should sink this project. The damage to the region will cost the state many more dollars than the board feet returns the service hopes to use to shore up its budget with this plan. The forest's value, financial and philosophical, is its intact, living status.

Where is the plan for improving your budget in ways that aren't destructive to the forest?
