Comments: Re: Sandwich Vegetative Management Plan

Please abandon implementing the Sandwich Vegetative Management Plan, Project #57392.

Alternatively, please extend the comment period before implementing Project #57392.

This would allow citizens time to research potential negative impacts of the proposed SVMP. The plan, as written, glosses over or completely ignores issues such as the release of stored carbon dioxide when mature trees are cut; the dangers of "controlled" fire in our forests; effects of herbicides applied to various species of plants; soil impaction from building new roads and infrastructure; and how the plan will affect the beauty and recreational use of our trails.
