Comments: We have been in many areas of Colorado and Wyoming and have
been sadly shocked to see how degraded the land looks. From dust storms in areas of Colorado, to sick livestock pushing against barbed wire trying to get to grasses on the otherwise we are disappointed in the failure of this countries leadership to take of our public, and leased lands. Even some of the forests have livestock in them!! That is not the deal I ever for. We have been bird watching in many areas of this country, and it seems the West has been totally lacking in being managed. Please cut acknowledge the leasing of livestock and leave the wildlufe, and wildhorses alone.
