Title:

Comments: Are you guys crazy???

Why would you do this to the mountains -- and to us? The trees don't need to be cut down, the forest doesn't need fires burning--it's like the great ravages of the mountains at the beginning of the century. Have you heard of climate change? We'll be enveloped by smoke from the fires, noise from your huge machines, loss of bird song and life from the removal of trees. Our trails will be bisected by the giant tracks of lumbering trucks. This is where we come and live to ENJOY nature, not to experience you destroying it.

Don't do this cutting, thinning, burning. Ask us for donations if you need money but don't ruin our forests!
