Title:

Comments: Dear National Forest Service,

I am deeply opposed to the current logging plan #57392 (Sandwich Vegetation Management)). I do not see any evidence that this plan, based on research from the early 2000's, has included any environmental impact analysis related to carbon emissions or climate change. This entire project should be paused until a thorough review of the project is conducted with updated information.

A re-evaluation of the planned burning, based on new thinking about how to preserve forests and protect life, must also be included.

Please do not begin this work until a thorough review is conducted.

Sincerely,

Mary Catherine Cavey
