Title:

Comments: White Mountain National Forest Project # 57392

To USDA and WMNF Services

We oppose this project for many reasons. It appears this 18 year old plan is out of date. Listed in your proposal is a list of very important concerns the project had not considered. This alone should stop the project and require a revisit to this project.

We also oppose this project for all the disruptions that will occur such as ecological, wildlife, human, health of the forest in general , carbon impacts and other negative impacts a project of this size will render. Please go back to the drawing board, toss out this outdated plan and listen and hear the public voices... There is much to reassess.

Thank you.

Donna Veilleux
