Title:

Comments: I am writing this with concerns on this Project. Heavy equipment access points in Ferncroft. The obvious noise levels related to the cutting, harvesting and skidding. The prescribed burning, how often will this process be implemented and how far into the future will it continue? Cost of maintaining permanent wildlife openings and how often, annually, blocks of 5 yrs., 10yrs? (seems like there is ample open space near the forest all around Wonalancet). Additional roads built in the forest potentially creating a multi- use access resulting in further impact. Then there are the undesired conditions of the Forest Plan to vegetation, wildlife, and other resources! " No Significant Impact" ?! No Guarantees! Thank you for your attention.
