Title:

Comments: I am extremely concerned about the negative, possibly catastrophic, impact that this will have on the hiking trails and wildlife in the Sandwich and Chocorua ranges. In addition, the burn will release huge, unnecessary carbon into the atmosphere from both slash and soil that we can little afford.

These practices do not seem to take into account the recent findings on forestry management and carbon sequestration that the USG has recently funded and has provided NEFF with a multimillion dollar grant to implement.
