Comments: Hearing about what is to come of the land surrounding Mount Chocorua's prized land is simply appalling.

The mere fact your operation will halt any form of hiking, biking, walking, cross-country skiing, snowshoeing, mushrooming, swimming etc... for 5 to 10 years is absolutely devastating.

In my twinkling years, I'm afraid the place I love the most while living in NH is the area which you intend to destroy.

Who benefits from this move? I'm quite certain our wildlife (birds, bugs, amphibians) don't.

Please consider the destruction to the web of life .
