Comments: I personally object to the timber harvest in the sandwich range. This section of forest is one of the most special areas I have found and is home to old growth forests and peaceful remote wilderness. I use the land for recreation along with so many other local community members as well as visitors and tourists. Please harvest from elsewhere. I understand that timber is a vital industry but we have many forests in the region and none are as special in my opinion, as the sandwich range.

Thank you for your consideration
