Comments: Dear Sir/Madam,

The goals and rationale for this project seem well-thought out and based on science. I disagree with the stated conclusion that "the environmental impact would be minimal".

The proximity of logging activity, burning, road-building and heavy machinery adjacent to a popular, heavily-used trail system would present safety hazards to human activity. The indigenous flora and fauna would be profoundly impacted negatively secondary to habitat destruction.

I am therefore opposed to this project.

Respectfully Submitted,

Robert L Stone, RN
