Comments: The Sandwich mountain area is precious and priceless to me, as a hiker and lover of these forests. They are beloved to my family and my ancestors. We also love the view of these uninterrupted forests from our family home. With the climate crisis and increasing pressure on public lands, wildlife, and other commons resources such as water, we need to protect our standing forests now more than ever. Let us care for our public forests differently and deeply consider the impact on local residents. Please provide greater protection for our maturing forests, and let our forests and quiet places be.
