Comments: I am writing in support of the proposed improvements to Bear/Summit. A connection like this would improve skier flow at the resort. The added terrain would spread people out and reduce all the congestion on summit run/miracle mile. The proposed expansion area is already used for bike trails and forest roads. It is not a wilderness or untouched area.

After the proposed improvements it would be nice to see a replacement chair from the bottom of 10 to the top of 7. Perhaps an upgrade to chair 9 also.
