Title:

Comments: Stay out of this area and stay away and out of what is left of our forests.

Keep private commercial interests from using public lands. Logging is not a fix for wildfire and it insults my intelligence for the department of interior/forest service to promote this bs as truth.

This is opportunity to learn how forest takes care of itself best. Protect, watch, and assist how the forest restores itself to health... learn (the design way about the intelligence of human ability to see let alone do?)

Give this area back to the nonhumans who live there and stay outta their the way.
