Title:

Comments: An excellent idea:

- a) To help better provide for the public to access public lands on a year round basis and enjoy outdoor recreation.
- b) To eliminate the need for winter time bus/shuttle "interconnect" service and all the adverse environmental impacts that has.
- c) To eliminate the shuttle and the impact the shuttle service has on winter roadway traffic.
- d) To encourage the use of established, designated and maintained mountain biking trails. Which helps to discourage the use of mountain bikes in forest areas outside the recreation/permit area boundaries and all the related environmental and soil erosion impacts that entails.
- e) To further encourage the use of the permitted recreation areas by the public further encouraging healthy living and lifestyles.
- f) To provide a clear area to offer a fire break protecting the lower Moonridge (and adjacent) residential areas.
- g) Because it would be an amazing improvement.
